

Looking for Python coder!

1. Can you code Python/Django?
2. Would you like to get some experience of the fast moving startup world?
3. Would you like to enrich your student life by creating real market value?
4. Have your say and opinion on things?
5. And do all this with lots of fun?

Then email me: adomas@fashnpolis.com (I am a PGT student at LSE and also the founder)

I am backed by seed capital. **This is a paid part-time position with flexible hours.** Terms of reference (the tasks to be done) are pre-defined but longer term engagement is also possible. If it goes really well, even the equity sharing is possible.

Fashnpolis.com is a style shopping startup, trying to breakthrough to the significant levels. Broadening our partnerships in the fashion world, we will be covering London Fashion Week soon.

Adomas from FashnPolis
